Edited by James D. Brierley,
Mary K. Gospodarowicz and Christian Wittekind

Providing the latest, internationally agreed-upon standards to describe and categorize cancer stages and progression

TNM Classification of Malignant Tumours eighth edition provides the latest, internationally agreed-upon standards to describe and categorize cancer stage. Published in affiliation with the Union for International Cancer Control (UICC) this authoritative pocket sized guide contains important updated organ-specific classifications that oncologists and other professionals who manage patients with cancer need to accurately classify tumours for staging, prognosis and treatment.

Arranged by anatomical region, this edition delivers updates in staging for cervical nodes, carcinomas of the oral cavity and nasopharynx, carcinomas of the thyroid, oesophagus, stomach, anal canal, the lung and pleura, skin, ovary, prostate, penis and adrenal cortex, as well as neuroendocrine tumours, and bone and soft tissue sarcomas.

In addition there are new classifications for p16 positive oropharyngeal carcinomas, carcinomas of the thymus, neuroendocrine tumours of the pancreas, and sarcomas of the spine and pelvis and soft tissue sarcomas of the head and neck, thoracic and abdominal visceral and retroperitoneum.

To facilitate the collection of stage data for cancer surveillance in low and middle income countries there are new sections on Essential TNM in colon, breast, prostate and lung carcinomas and simplified Stage for Paediatric Cancer.

ISBN: 9781119263579 | 264 pages | December 2016

Discounted price for UICC members

€35.18, £26.24, \$41.25
